DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on December 19, 2006 has been entered.

Claim 2 is cancelled, and claims 3 and 5-24 are pending.

Claim Objections

Claim 6 is objected to because of the following informalities: the recitations of "at least one reinforcing fin" in lines 4 and 6 should read -- the at least one reinforcing fin --. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 3, 7-11 and 14-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Sugimoto et al (5,992,514)(Figure 1). Sugimoto et al ('514) discloses webs/beads 4 and reinforcing fins connected thereto. Regarding claim 9, the presence of a method limitation in an apparatus claim bears no patentable weight in this instance. See MPEP 2113.

Allowable Subject Matter

Claims 5-6, 13 and 24 are allowed.

Claims 22-23 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

The rejections in view of Haussmann and Inoue et al are withdrawn in view of the claim amendment.

Applicant's arguments have been fully considered but they are not persuasive.

Applicants' remarks with respect to Sugimoto et al ('514) are mistaken. Sugimoto et al (column 5, lines 44-47 and below) discloses the side plates 23, 33 are *integrally* formed together.

two heat exchanger core portions as shown in FIG. 2. As shown in FIG. 1, the side plates 23 and 33 are integrally 45 formed from a sheet of aluminum plate to a general U-shape in cross-sections. A connecting portion 4 for connecting the

Thus, one of ordinary skill in the art would recognize the two side plates 23, 33 of Sugimoto et al are not two separate structures, but a single integral structure.

No further comments are deemed necessary at this time.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
